

Transparency, efficiency and intelligence in every default transaction

TrackPoint Platform

Title Module – *increased service, support and automated ordering.*

OVERVIEW

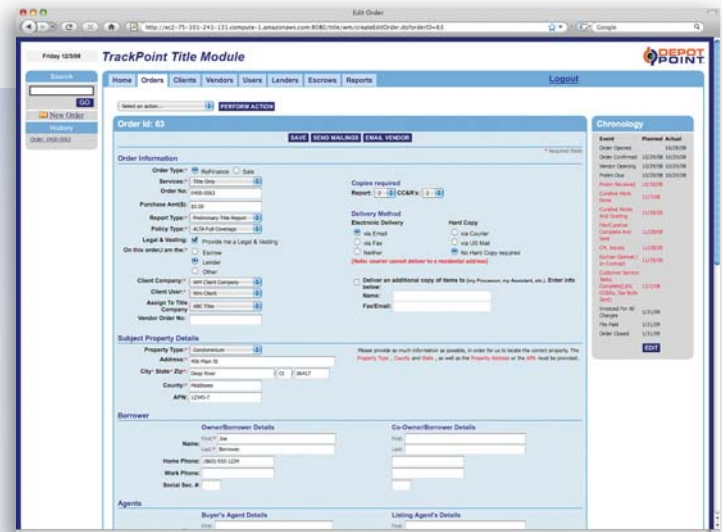

TitleTrackPoint is a web-based workflow solution that brings efficiency to title order processing and allows title companies to expand and secure business even during a weak economic climate.

- ✓ *Collapsed elapsed time through automated title processing activities*
- ✓ *Lower cost title order automation*
- ✓ *User visibility leads to increased accountability amongst all players*
- ✓ *Real-time updates with up-to-the-minute data*

- Clients of title companies have access to a web-based platform to place title orders automatically, upload applicable and required documentation, and follow a file through the entire title process
- Automated order processing and submittal lowers processing costs. There is no longer the need to email, call, fax, etc. All parties utilize one system to maximize efficiency and ensure transparency on every order
- Automated order processing; provides clients, lenders, and vendors a comprehensive and accurate timeline to follow throughout the order process.
- Timeline and electronic activity management eliminates errors, holds users accountable, and gives everyone visibility at every stage of the order

SPECIFIC FEATURES

- Flexible process mapping
- Customizable reporting capabilities
- Smooth interface and data flow with other systems
- Scalable work process solution that automates title orders
- Real-time communication between all participants in the process
- User visibility leads to increased accountability amongst all players
- All required tasks electronically calendarized
- Each client may have different steps and timelines for closing title orders
- Dynamically re-calendarized according to completed task

Scalable, automated, error-free title processing. Call 1-866-841-5641 or email Enquiries@depotpoint.com.
